PROJECT WORK

Hotel Booking System
- ✓ Using Java, SQL, and MongoDB. Created a hotel booking system with 3 pages.
- ✓ 2 pages: Signup and Login page also introduced in it so the user can login with their ID and Password.
- ✓ Database connectivity is used in it in login, signup and hotel booking pages for those 3 pages.
- ✓ Utilized MySQL Workbench for secure credential storage and MongoDB for efficient data management of 14 fields.

Expense Tracker
- ✓ Developed an expense tracker using JavaFX for the GUI and MySQL for database management for 1000 entries.
- ✓ Implemented full CRUD operations to add, delete, update, and display expenses.
- ✓ Added a feature to retrieve 100% data and display previously recorded expenses in a table format.

ACHIEVEMENTS
- Volunteer in Khelo India University Games to Manage all Sports person to stay in Lucknow.
- Helping poor people for daily needs in my locality during the Covid 1st wave.
- National Cancer Control Programming (CAS) Award of Social Service.
